

Renewal-risk report — Meridian Health

MERID-001 · contracts: CTR-2023-MH-001, CTR-2024-MH-002 · generated 2026-04-27T10:09:40

RENEWAL RISK: YELLOW

Engineering usage is growing and the core relationship with Sarah is intact, but unresolved post-expiry billing, a recurring Marketing seat dispute ignored across four tickets, 8 SLA breaches, and James's legal-team warning make this renewal materially at risk.

Executive narrative

Meridian Health (MERID-001) presents a split picture. Engineering is the anchor: sessions grew from a Q1 average of 213.3 to a Q4 average of 246.8 (a 15.7% increase), seat utilisation sits at 79.77%, and feature adoption at 62.74%. Sarah is an active champion and has confirmed the product is embedded in Engineering's daily workflow. These are strong retention signals for the larger part of the contract. The risk sits squarely in three compounding problems that James surfaced on the renewal kick-off call (CRM-084, 2026-03-10). First, the contract expired in November 2025 and billing has continued without a signed renewal — Meridian's legal team is now asking questions, and support ticket INT-1153 flagged this as a churn risk in early February. Second, the Marketing seat issue has been raised through support four times (TKT-4871, TKT-4903, TKT-4909, TKT-4920); Lisa's team is paying for 12 seats while actively using 3, and escalations routed to Elena's queue were invisible to Tomás during the AM transition. MW's email (EM-0061) has put this on the formal vendor-review agenda. Third, the account has accumulated 8 SLA breaches across 22 tickets, 10 of which remain open, with a maximum resolution time of 20.97 days; the SLA credit CN-2025-MH-002 (€929.18) was nearly missed during the Elena-to-Tomás handoff and only applied after personal intervention. Billing hygiene is also a concern: 16 payment reminders, 17 overdue events, and 3 partial payments have been recorded, though outstanding balance is currently €3,701.34 and the one dispute opened has been resolved. Tomás must walk into the next call with James having resolved the contract-status question, a concrete Marketing right-sizing proposal, and a clear SLA remediation plan — or this Yellow tips Red.

Talking points for the renewal

1. Resolve the post-expiry billing and contract-status issue before any commercial discussion

James explicitly raised that billing continued after the contract expired in November 2025 with no formal renewal on file, and his legal team is involved (CRM-084). Support ticket INT-1153 flagged this as a critical escalation and churn risk. Come to the next call with a written clarification of the billing period, a credit or adjustment for any disputed post-expiry charges, and a draft renewal order ready to sign. Do not let the commercial conversation proceed while legal exposure is unresolved.

2. Bring a concrete Marketing seat right-sizing proposal — Lisa's issue has been raised four times and is now on the vendor-review agenda

Lisa's team is paying for 12 Marketing seats with mean seat utilisation of 42.58% and mean active users of 6.92. The issue was raised in TKT-4871, TKT-4903, TKT-4909, and TKT-4920 (INT-1153, INT-1150). MW's email EM-0061 has added it to the formal vendor review. Proactively propose right-sizing Marketing seats (CRM-083 suggested 8) with a corresponding price adjustment. Acknowledge the repeated escalations directly to James and Lisa — do not wait for them to raise it again.

3. Address the 8 SLA breaches and 10 open tickets head-on, and confirm the SLA credit was correctly applied

There are 8 SLA breaches across 22 tickets, 10 still open, and a maximum resolution time of 20.97 days. The SLA credit CN-2025-MH-002 (€929.18) was nearly missed during the AM handoff from Elena to Tomás and required personal verification before the February invoice (CRM-080). James noted the credit was 'almost missed' (CRM-084). Bring a written summary of all open tickets with committed resolution dates, confirm the credit was applied to the February invoice, and offer a support review cadence as part of the renewal terms.
